

# Investor Portal Plan

A gated investor platform for PIN — onboarding, KYC, Spotlight, and founder-controlled data rooms with full admin visibility. Approved pending final sign-off.

## SUMMARY

Investors join via a simplified **/investor** landing page (form removed, single CTA to onboarding). After admin approval and KYC, they browse PARAGON-complete startups in **Spotlight**, express interest through the platform, and access data rooms when the **founder grants permission**. Admin is automatically notified on every grant or denial — Pinpoint stays in the loop and no deal happens off-platform. Slack is dropped; notifications move in-app + email.

## INVESTOR FLOW

|                 |                                                                                      |
|-----------------|--------------------------------------------------------------------------------------|
| 1. Landing      | /investor — informational page with CTA (label configurable by admin)                |
| 2. Onboarding   | Individual or Corporate profile + KYC upload + terms + password                      |
| 3. Admin review | Investor Relations activates account; Compliance approves KYC                        |
| 4. Spotlight    | Browse PARAGON-complete startups — summary + pitch deck                              |
| 5. Interest     | Submit interest via portal: (a) more details, (b) founder call, (c) data room access |
| 6. Data room    | Founder grants access from dashboard; admin notified automatically; no self-serve    |

## DATA ROOM ACCESS — WHO GRANTS?

**The founder grants access.** Admin does not gate every request, but is automatically notified the moment a founder grants or denies access. Every action is logged. Super Admin can revoke any grant. Interest always enters through the platform first — founders and investors cannot connect off-platform.

## KYC REQUIREMENTS

### Corporate

- Contact name, email, phone
- Company name & address
- Document: Company certificate

### Individual

- Full name, email, phone, address
- Document: Valid ID card

## ACCESS BEFORE KYC APPROVAL

|           |                                                         |
|-----------|---------------------------------------------------------|
| Can do    | Browse Spotlight listings and read startup summaries    |
| Cannot do | View pitch decks, submit interest, or access data rooms |

## DATA ROOM WORKFLOW

|                              |                                                              |
|------------------------------|--------------------------------------------------------------|
| 1. Investor submits interest | Through portal only — not direct contact with founder        |
| 2. Notifications sent        | Founder and admin both notified simultaneously               |
| 3. Founder decides           | Grant or deny data room access from founder dashboard        |
| 4. Admin notified            | Instant in-app + email alert on every grant or denial        |
| 5. Audit log                 | Full record: investor, startup, founder, timestamp, decision |
| 6. Admin override            | Super Admin can revoke any grant if needed                   |

## FOUNDER CHANGES

|            |                                                                             |
|------------|-----------------------------------------------------------------------------|
| Kept       | Founders grant/deny data room access — now inside authenticated portal      |
| Added      | Spotlight content page — one-liner, summary (500 chars), pitch deck         |
| Added      | Interest inbox — see investor submissions before granting access            |
| Documents  | Split into tiers: pitch deck (Spotlight) vs sensitive docs (data room only) |
| Publishing | Founders submit Spotlight content; admin reviews and publishes              |
| Removed    | Public /verify/{slug} pages and anonymous token-based access                |

## SPOTLIGHT VS DATA ROOM

|                                    |                                                                   |
|------------------------------------|-------------------------------------------------------------------|
| Spotlight (KYC-approved investors) | Company name, summary, PARAGON score, badges, pitch deck          |
| Data room (founder-granted only)   | Cap table, financials, bank statements, contracts, unit economics |

## NEW ADMIN ROLES

|                          |                                                                |
|--------------------------|----------------------------------------------------------------|
| Compliance Officer       | Approves / rejects KYC documents                               |
| Investor Relations       | Investor onboarding, Spotlight publishing, monitors access log |
| Existing roles unchanged | Super Admin (full access + revoke override), Analyst, Support  |

## KEY ADMIN RESPONSIBILITIES

- Review investor onboarding and activate accounts
- Approve KYC (Compliance) — separate from account activation
- Feature startups in Spotlight after PARAGON completion
- Monitor all data room grants/denials via real-time notifications and audit log
- Revoke access when necessary (Super Admin)
- Create platform announcements (fundraise, investment, events)

## NOTIFICATIONS

|           |                                                                                                                            |
|-----------|----------------------------------------------------------------------------------------------------------------------------|
| Investors | Spotlight additions, fundraise/investment/event alerts, KYC result, access granted/denied, new investor joined (anonymous) |
| Founders  | New investor interest, Spotlight published, access decision confirmation                                                   |
| Admin     | Every data room grant/deny, new onboarding, KYC submissions, new interest                                                  |

## WHAT CHANGES FROM TODAY

|                   |                                                                         |
|-------------------|-------------------------------------------------------------------------|
| /investor page    | Long application form → landing page with CTA only                      |
| Investor accounts | None → authenticated portal with login                                  |
| Data room access  | Public token links → founder-granted inside portal, admin auto-notified |
| Founder control   | Kept — founders grant access; admin sees every decision                 |
| Admin team        | 3 roles → 5 roles (+ Compliance, Investor Relations)                    |
| Notifications     | Email only → in-app + email                                             |
| Slack             | Dropped                                                                 |

## SECURITY & TRANSITION

- Separate investor auth guard; role-based admin permissions on every route
- KYC documents encrypted; full audit trail on KYC decisions and every data room grant/deny
- Existing token links honoured for 30 days, then disabled
- Old application records archived, not deleted

## BUILD TIMELINE (AFTER APPROVAL)

|           |                                                           |
|-----------|-----------------------------------------------------------|
| Phase 1–2 | Investor auth, onboarding, KYC, new admin roles — 3 weeks |
| Phase 3–4 | Founder updates, Spotlight — 3 weeks                      |
| Phase 5–6 | Interest, data rooms, notifications — 2.5 weeks           |
| Phase 7   | Transition, QA, security review — 1 week                  |
| Total     | ~9–10 weeks                                               |

## OUT OF SCOPE (V1)

Investor-founder direct messaging, automated fundraise detection, on-platform payments, mobile app, mandate profiling form, Slack.

CONFIRMED DECISIONS

Updated per review feedback. Please sign to proceed with development.

- 1

Two new admin roles: Compliance + Investor Relations

CONFIRMED
- 2

Founders grant data room access; admin auto-notified on every grant/deny

Pinpoint stays in the loop — no off-platform deals

UPDATED · CONFIRMED
- 3

Retire public /verify pages after 30-day transition

CONFIRMED
- 4

Pre-KYC: summaries yes, pitch decks no

CONFIRMED
- 5

Pitch deck in Spotlight only; all other docs in data room

CONFIRMED
- 6

Founders submit Spotlight content; admin publishes

CONFIRMED
- 7

New investor notification is anonymous

CONFIRMED
- 8

Fundraise / investment / event alerts created by admin

CONFIRMED
- 9

30-day transition for existing token links

CONFIRMED
- 10

KYC approval separate from account activation

CONFIRMED

Approval

I have reviewed this plan (v2.1) and approve proceeding with development as specified above.
